Bagian 1: Untuk Admin/Trainer

1.1 Apa itu Webcam Guard?

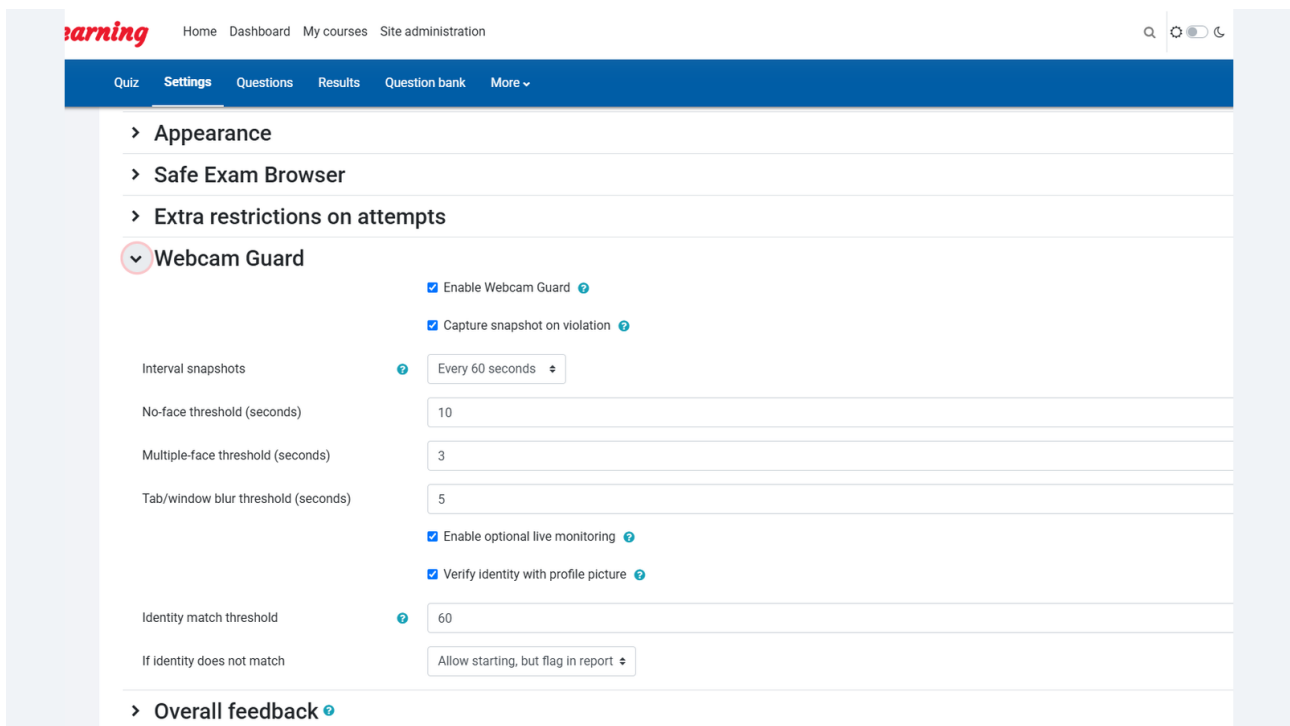

Plugin Moodle untuk pengawasan webcam otomatis: monitoring, deteksi pelanggaran, snapshot, risk score, review, live monitoring, kirim info.

1.2 Dashboard

Menu course → Webcam Guard Dashboard. Ringkasan semua quiz dengan Webcam Guard.

1.3 Mengaktifkan

Quiz → Settings → Webcam Guard → centang Enable → atur → simpan.

The screenshot displays the Moodle Quiz Settings interface. At the top, there's a navigation bar with links like Home, Dashboard, My courses, and Site administration. Below this is a blue header with tabs for Quiz, Settings, Questions, Results, Question bank, and More. The main content area shows a list of settings categories: Appearance, Safe Exam Browser, Extra restrictions on attempts, and Webcam Guard. The Webcam Guard section is expanded and highlighted with a red circle. It contains several toggle switches and input fields: 'Enable Webcam Guard' (checked), 'Capture snapshot on violation' (checked), 'Interval snapshots' (Every 60 seconds), 'No-face threshold (seconds)' (10), 'Multiple-face threshold (seconds)' (3), 'Tab/window blur threshold (seconds)' (5), 'Enable optional live monitoring' (checked), 'Verify identity with profile picture' (checked), 'Identity match threshold' (60), and 'If identity does not match' (Allow starting, but flag in report). At the bottom of the settings list is an 'Overall feedback' section.
